

Will the broadcast flag interfere with consumers ability to make copies of DTV content for their personal use, either on personal video recorders or removable media?

Yes it would Interfere with my ablility, feel they would call commercials copyrights and I would not be able to block veiwing of them.

Would the digital flag interfere with consumers ability to send DTV content across networks, such as home digital networks connecting digital set top boxes, digital recorders, digital servers and digital display devices? Anyone that has used any of the current software knows these safeguards are in affect allready and whats to keep them from creating more

Would the broadcast flag requirement limit consumers ability to use their existing electronic equipment (equipment not built to look for the flag) or make it difficult to use older components with new equipment that is compliant with the broadcast flag standard?

Its allready in effect same answer as question 2

Would a broadcast flag requirement limit the development of future equipment providing consumers with new options?

Yes it would regulate creative minds exploreing new areas like copywrites on a paint brush so artists could not use it to paint a picture of his envorment

What will be the cost impact, if any, that a broadcast flag requirement would have on consumer electronics equipment?

Cost would be high digital equip. allready in use would be outdated unable to playback cust media.

Other Comments:

Digital is nothing more than a switch on and off like the telegraph wires of the 1800,s Computers just switch faster then a mans fingers, and this is all this amounts too, so if any copywrites belong to anyone its to the first telegraph companies of the 1800,s. Some of us in the USA dont have Ditgital Systems in Place or even Water yet. so this what you call getting the Horse in front of the Cart.
